Student Remarks
shsts
Prof. Ayons style of teaching didnt suit me at all. Personally I had to struggle a lot to try and keep up with the class. I didnt feel like I wasnt supposed to know much of Systems Design before this course. By the end of the first month of classes, keeping up with the class was incredibly difficult for me. I didnt feel like the fundamentals of the subject were taught well.
Good
its a good course

a good course\n
need better TAs, they were neither helpful in lab nor class
the prof teaches too fast and Im not able to understand and follow the concepts properly he doesnt give many examples on a topic and the exams conducted are not doable in a limited amount of time and its hard for an idea to strike to solve those problems during or even after the exam
Course was good and nicely done.
Course went very well, and the presentations made are very nice. But I felt quiz-2 paper was not properly structured, as you can see the average also went down. Because, its hard to think and get the idea in very short time provided. Also, it would be better if you make classes a bit more interactive, Thank you.
