Student Remarks
Good course. An even better instructor.
enjoy his unique style of teaching.
OUTSTANDING
Positives:The best atmosphere in a class. Very lively professor. Drawbacks:Felt like the introduction to ML part was missing in this course. I really liked the introduction of course in Prof. Yaser Moustafa(Caltech) lectures and think this course should start off in that fashion. A lot more industry, practical applications need to be discussed during the class. Course should be a bit less math intensive. Course content needs to be made more interactive
Please give time in explaining the topic more, rather than just dictating from notes.
prerequisite of the course doesnt matches the actual one.
very good
Super Course. Loved It.Professor was stud max.
some practical implication / examples need to be provided to better understand the importance of concepts taught and for.motivation.

The profs jokes really livened up what was otherwise standard content that can be found anywhere. His style of delivery made it worth attending even the boring parts on probab and Linal etc.Data Contest seems like a good idea.
Good course
